

# Global Reach

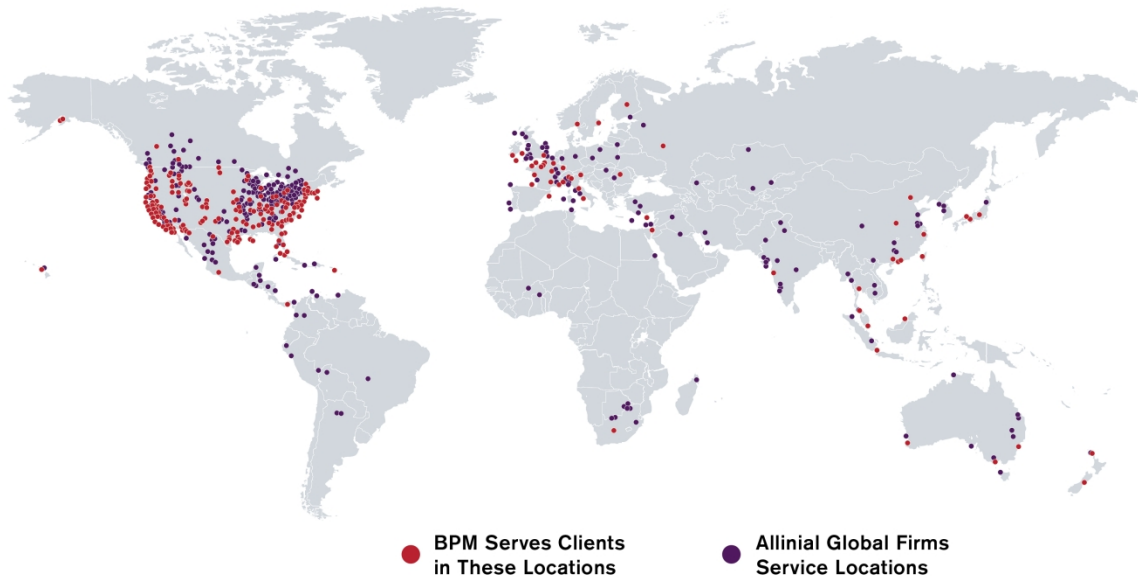

## A Competitive Advantage for Clientele Worldwide

The accessibility and responsiveness that distinguish BPM don't stop at the United States border. From our Hong Kong and Cayman Islands offices to our tax and audit work in Europe, we have the flexible capability and expertise to support our clients anywhere in the world. With one of the largest International Tax teams on the West Coast, we deal with challenging issues for both multinational families and corporations such as transfer pricing, IC-DISC, and IP transfer to name just a few.

Our international experts are available to work on-site to meet clients' diverse needs, providing the same standard of dedicated professional service that we deliver back home. When additional local proficiency is required, we draw upon the strengths of our partner firms.

## Global Alliance

As a select partner of Allinial Global, we have access to nearly 200 member firms in locations throughout the world. Our affiliations enable us to transfer international resources and benefits directly to our clients. This means more diverse services, broader industry expertise and greater opportunities for our international clients. Whether it's establishing the first overseas subsidiary or operating long-standing facilities in multiple countries, our clients trust BPM to provide the same proactive approach and personalized service as in a domestic engagement.

## China Focus

With more than 30 BPMers fluent in Mandarin and Cantonese, we offer tax and consulting services to both individuals and businesses throughout Greater China. To learn more about the services we provide, [click here](#).
