
Public Charities

Overview

BPM has been at the forefront of providing public charities with distinctive accounting, tax, and consulting services for over twenty-five years. Our diverse Nonprofit Services Group has served a wide variety of public charities, including churches and other religious organizations, qualified medical research organizations, schools and colleges, performing arts organizations and museums, and voluntary health and welfare organizations.

Our clients include well established organizations with significant endowments and diverse operations as well as smaller, singularly-focused organizations. Our Nonprofit Services Group provides clients with a wide range of services beyond audit and tax, such as:

- Accounting software recommendations
- Database design and testing
- Financial projection and model development
- Network system design and development
- Planned giving options
- Risk assessment

As a commitment to the nonprofit community, BPM provides training and continuing education for our friends and clients in the nonprofit sector. Throughout the year, our Nonprofit Services Group hosts a free Nonprofit Education Series on a variety of topics related to nonprofit management. BPM partners serve on a multitude of boards in the community and have been active on committees with the California Association of Nonprofits and the Independent Sector. Our commitment to serve the nonprofit sector is a core part of BPM's foundation.
