

Technology

Overview

Being on the brink of the latest technological advancements means technology companies have very specific and complex needs. In order to remain profitable, you must capitalize on market opportunities and sustain growth in an increasingly global marketplace. In addition, you must also learn to navigate the rapidly-changing financial and accounting landscape. BPM's Technology group consists of dedicated professionals with years of experience in dealing with the intricacies of the Technology industry. We are set apart by a deep understanding of the semiconductor, hardware, software, cloud computing and internet, and telecommunication sectors, as well as extensive experience ranging from venture backed start-up companies to multinational public companies.

Our Technology professionals have in-depth experience on a wide range of issues that your industry faces, including revenue recognition, inventory valuation and obsolescence, debt and equity financings, IFRS, and fair value accounting. In addition, our team will help you establish internal accounting controls, perform audits of your financial statements, select your team of trusted advisors, and offer valuable insight throughout your entire business life cycle.

Areas We Serve:

- Hardware and Networking
- Internet and Mobile
- Semiconductor
- Software
- Information Security
- Cloud Computing
- CleanTech / Energy
