

# Keith Chow

## Director, Technical Operations

**Fairfield**  
5030 Business Center Drive, Suite 125  
Fairfield, California 94534

### Overview

Keith has nearly 20 years of IT Security Advisory experience and has a deep background in operational IT and engineering security best practices, system administration, FedRAMP, ISO and NIST. He is also responsible for the practice SIEM deployment and supports the overall advisory services with his technical expertise.

Keith commonly assists mid-market customers with security attestation, authorization, and certification, which he tailors to an organization's specific needs.

Keith assists clients with the design and implementation of SIEM solutions tied to our MSSP service, and provides vulnerability scanning and penetration test services within his team. He has grown the SOC team infrastructure and practice to assist companies in fulfilling their Continuous Monitoring obligations to their customers.

Keith is skilled in FedRAMP, ISO, NIST, SOC2, security, operations, IT, engineering practices, SOC and SIEM deployment. He is also knowledgeable in penetration testing, Linux, Windows and Enterprise Storage.

### Interesting Tidbit

When not working, Keith is spending time at a local coffee shop, looking at new technologies and enjoying pop culture.
