

International Tax Services

Overview

Overview

BPM's International Tax Services (ITS) Practice represents a compelling value proposition: ready access to highly-qualified ITS professionals who can provide the same comprehensive range of high-value specialized international tax and transfer pricing services as the Big-4 and other national firms – but in a more responsive manner and at BPM's significantly lower regional firm rates.

Our ITS practice is among the largest and most experienced in the Bay Area and on the West Coast. It is led by and includes former Big-4 and national firm ITS partners, practice leaders and credentialed team members. Our ITS professionals have worked in the U.S. Tax Court, the U.S. Treasury Department General Counsel's office, the IRS National Office, and senior-level corporate and consulting firm positions in Europe, Asia, Mexico and Latin America.

We assist companies at all stages of growth, from pre-formation and start-up, through early-stage and mid-market, to Fortune 50 multinationals. The depth and breadth of our international tax and transfer pricing expertise and experience ensures that you receive value-added insights and top-tier services that you can trust in even the most complex cross-border situations.

We specialize in mid-market and early-stage companies, offering the complete range of U.S. and foreign international tax and transfer pricing services. In addition to international tax strategic planning, consulting, compliance and tax provision services, our ITS practice includes a full-service transfer pricing team, enabling us to meet any and all of your global cross-border needs.

BPM's LEA Global Firm Network

For worldwide support on foreign tax, transfer pricing and other business matters, BPM's global firm network, Leading Edge Alliance (LEA), provides direct and immediate access to the same high level of cross-border expertise and top-tier services in other

countries throughout the globe. As the world's second-largest international firm alliance, BPM's LEA global firm network can open doors in the more than 106 countries where our 220 member firms operate.

BPM's LEA global firm network isn't just a glorified directory of loosely connected international providers, but an alliance of closely aligned firms helping each other work toward common goals. BPM's ITS team members don't need to search on Google to find the best expert in an unfamiliar geographic area for their clients — they already know the right people to contact within BPM's LEA global firm network.
