

# NetSuite Software Development

## Overview

When you invest the time and the budget into a world-class business management software like NetSuite, it's important to optimize it to fit your organization, leverage it to its full potential and ensure it works at maximum efficiency. You bought NetSuite to do more with less—let our experienced development team show you how.

BPM's Development team can help customize NetSuite to fit your organization's needs, integrate it with third-party applications and develop new functionality. We are one of the few full-service firms that offers in-house NetSuite development to work with you at all stages to tailor NetSuite specifically to your organization.

## NetSuite Customizations That Fit Into Your Business

The world is changing at an incredible pace. To maintain a competitive advantage, your business will need to constantly evolve. New products or services will emerge, and the once-relevant business processes may be no longer needed.

Tapping into your investment and leveraging the flexibility that makes NetSuite the leading cloud software application is easier than you may think, because NetSuite's development capabilities are unparalleled. Regardless the stage of your business, from seed round through maturity we understand your specific needs. Here are a few customizations our NetSuite Software Development team can help implement on Day 1:

- Approval Processes
- Custom NetSuite Pages
- Customization Review and Optimization
- Customer Database Integration
- Dynamic Transaction Forms
- Dynamic Email Templates
- Process Automation

## Protecting Your Investment

Every major investment requires careful maintenance and monitoring to ensure its longevity and continued benefit to the company. Our NetSuite Software Development team can run monthly tests and will work with you to ensure your software is reporting and processing data accurately after system updates or internal process changes.

Every organization has unique needs, and your investment in NetSuite should work where you need it and when you need it. Save time by utilizing BPM's Technology Solutions team for implementation, customization and optimization. Contact us today and see how we can help.
